

Ontological and Logical Issues on Geographic Representation and Spatial Reasoning

Geographic representation and spatial reasoning figure as pivotal and flourishing areas of intersection between philosophy and computer science. The workshop intends to provide a common environment where research programs in formal ontology, knowledge representation as well as analytic metaphysics may interact in fruitful ways by leading to shared grounds and novel ideas.

The Workshop will take place virtually via Teams on November, the 16th. The program (CET Time) is as follows:

14.20-14.30: Workshop Kick Off

14.30-15.30: Achille C. Varzi – Columbia University

Title: TBA

15.40-16.40: David M. Kovacs – Tel Aviv University

Title: The ontological dependence of homelands on nations

16.50-17.50: Torsten Hahmann – University of Maine

Title: TBA

17.50-18.00: Workshop Conclusions

Organizers: Riccardo Baratella and Daniele Porello
